

# TAKING OUT TRASH

☐ Take out the full bin carefully and put into the large trash can outside. ( Maybe divide the trash if recycling into the right containers)

☐ Secure that lid so little animals can't get in.

☐ Make sure there's no gunk at the bottom of the original bin.  
( Gunk = bad smells)

☐ Clean, if necessary with a paper towel and the household cleaner of choice.

☐ Put a new bin liner in correctly so it doesn't disappear when the first new trash is put in. \*\*Report if this is the last liner or it's getting low\*\*

☐ Wipe the lid, inside and out.

☐ Check the floor around the bin for dropped trash.

☐ Wash your hands

☐ Close all doors + cabinets + put back anything you used like dustpans, cleaners, wipes etc

☐
